## Certificate of Cleanliness

### *Clear-View Bailers*

January 19, 2024

#### Manufacturing Process

- Clear-View Tubing is extruded from Virgin PVC material.
- PVC & Polyethylene material is processed through the extruder at 395 degrees Fahrenheit.
- Material then passes through a sizer to cool and provide shape.
- Material then passes through a cutter to obtain accurate length.

#### Parts & Materials

- All bailer parts are manufactured from Virgin raw material, boxed, and stored until assembly.
- During the assembly process, bailers are cleaned with de-ionized water and air, bagged, and packaged for shipment.

This certificate of cleanliness is written and issued to the best knowledge of the writer, all products should be cleaned according to the Environmental Protection Agency (EPA) protocol prior to use. It is the responsibility of the end user to pre-clean the bailer according to local and federal guidelines and regulations prior to using the product. Please read your EPA protocol and requirements for this product and clean as required. ESP or the writer, do not accept any responsibility for products not cleaned to specifications by the EPA, prior to use of our product in the field.
